

Fukuoka 2020

Fukuoka City is the largest city in Kyushu, South-Western Japan. Its moderate climate, beautiful scenery and great location have made it popular with travellers worldwide. Fukuoka is clean, safe and has excellent amenities and offers a good quality of life. It is close to both mainland China and Korea and has excellent train and air connections to the rest of Japan. The central city zone is home to just 1.4 million people and is large enough to ensure there is plenty to do, see and try but nowhere near as daunting as tackling life in Tokyo can be - Fukuoka city centre is built on a human scale and is a comfortable living and study environment for Westerners looking to experience Japan, its culture and its language without becoming lost in the crowd.

The Japanese College is well situated in the city centre, just a few minutes from the central train/subway station & close to the banks, post offices and shops, several nearby parks (there's also a good local night life) plus a beautiful beach and resort area (Momochi) less than 20 minutes away.

The college has a large student lounge area, 14 classrooms (with air-con), computers with student internet access, Japanese study software and free wifi access on site.

Good range of courses, particularly suitable for short term study. Ideal for adults and students looking to improve their Japanese communication skills.

Eight surprising things about living in Japan !

- 1/ Traditional Japanese bath (You are expected to wash your body before you get in the bath, and everyone shares the same water.)
- 2/ Japan is the #1 importer of reggae. (It's true that reggae, and hip-hop, are very popular in Japan – there are always posters and fliers around the downtown area for concerts.)
- 3/ Overly complicated toilets (Many Western-style toilets in Japan include heated seats with temperature control, adjustable bidet functions etc.)
- 4/ Everyone assumes you're American (people do have an unfortunate tendency to ask foreigners "Are you American?").
- 5/ Bus drivers turn off the bus during red lights. (Possibly to help reduce pollution. There is a fairly large campaign called "Stop the idling".)
- 6/ No laughing at the cinema. (This might be because subtitles aren't as funny as the original movie, but in general Japanese people are pretty quiet at movies – even scary ones.)
- 7/ Hand basin on top of toilet cistern. (This is often considered a case of good design – the clean water going into the toilet cistern can be used to wash your hands after using the toilet.)
- 8/ Little flashing lights on kerbs and junctions at night.
